

# How to Disable SMART Products

On a desktop computer with Smart Software running please complete the following steps to disable:

1. Control + Alt + Delete

The Task Manager will appear as shown.

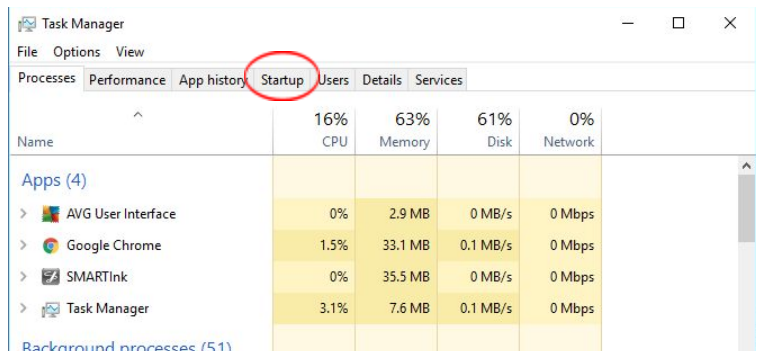

2. Choose **More Details** at the bottom of the screen.

3. After clicking more details, a screen will appear as soon on the right.

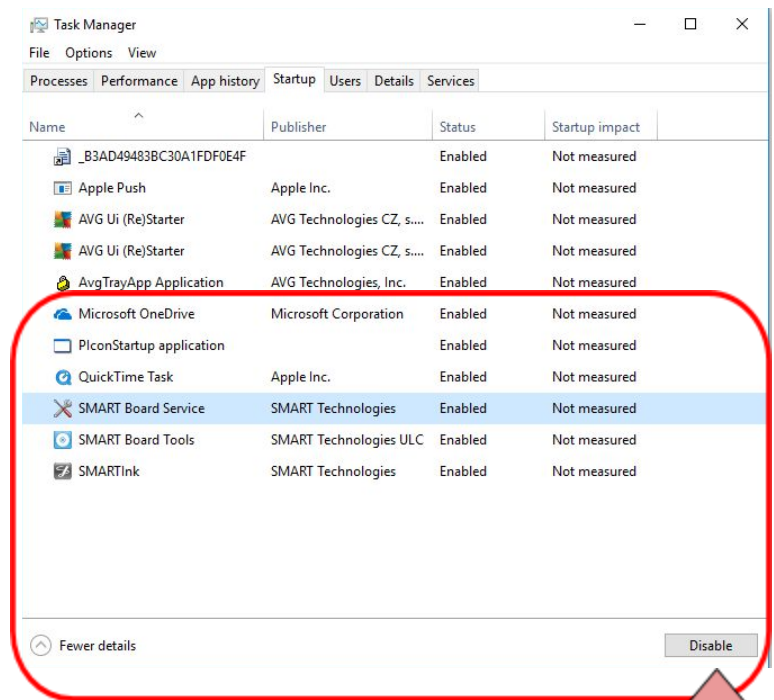

PLEASE CLICK ON STARTUP. This is located at top of the page of the task manager.

4. Scroll down and locate SMART BOARD SERVICES, SMART BOARD TOOLS, and SMARTINK. You will need to DISABLE ALL SMART Products you have enabled on your computer.

Click on each SMART Product separately and click DISABLE at the bottom of the screen.

5. You will need to RESTART your computer.

\*\*\*IMPORTANT: You will need to ENABLE ALL SMART Software if you want to use it again on STARTUP.
